positive regulation by host of viral genome replication positive regulation by host of v	positive regulation by host of viral process		dolichyl diphosphate biosynthetic process dolichyl diphosphate metabolic process				
	positive regulation of viral release viral genome replication				regulation of intracellular cholesterol transport regulation of intracellular cholesterol transport		
negative regulation by host of viral genome replication	negative regulation by host of viral process	modulation by host of viral genome replication	dolichyl diphosphate metabolic process		protein regulation localization to of cholesterol transport		
cellular response	vascular endothelial growth factor signaling to Vitamin patnway	response to organophosphorus	Wnt signaling pa involved in mid dopaminergic n	lbrain euron	negative negative r o <b>of-ATPas</b> activity	Initric-oxide	regulation of stem cell population maintenance
	response to purine–containing compound		differentiation dopaminergic neuron differentiation		energy derivation by oxidation of organic compounds	ventricular cardiac muscle tissue development	positive regulation of fibroblast proliferation
